

# Laboratory

Casework Solutions

**TMI**

TMI Cares

# Discovery

is an open ended process. It takes a mindset willing to question, investigate and explore. This is what drives laboratory environments, and this is what TMI facilitates through casework configurations. We design and build lab environments that support imagining, thinking, hypothesizing and testing.

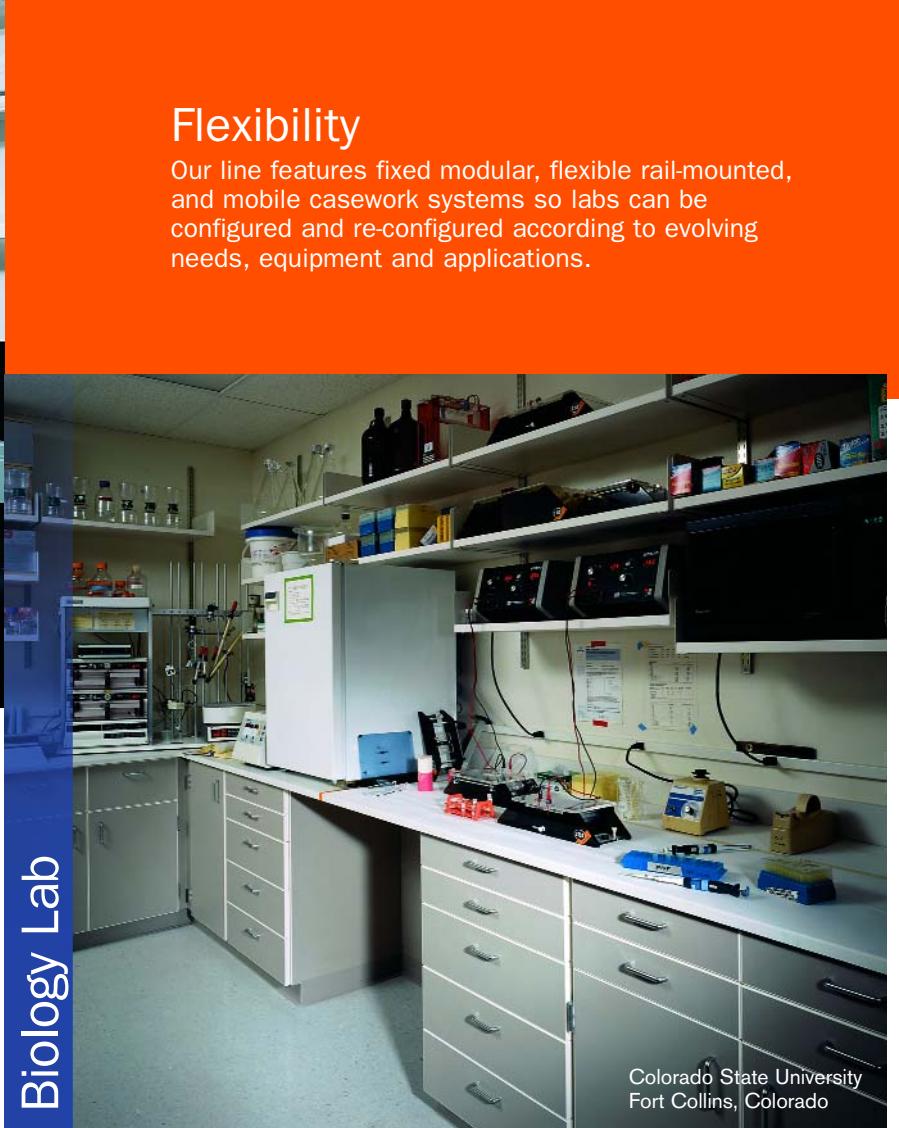

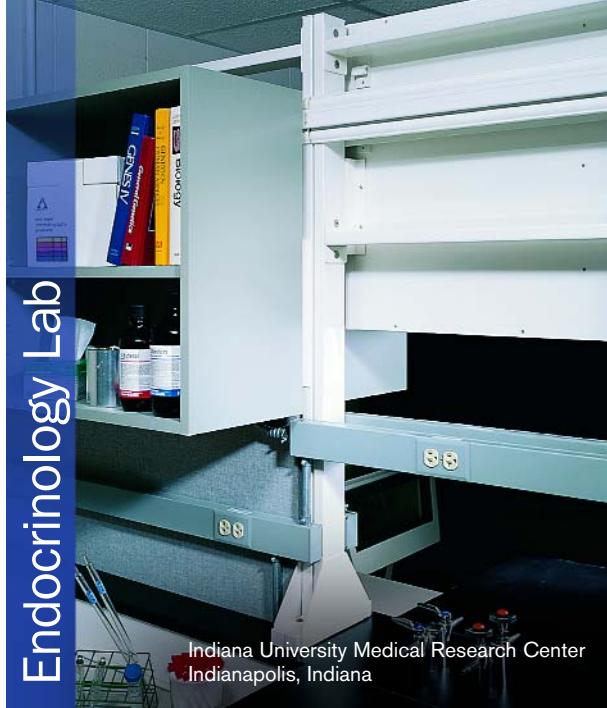

Research Lab

UCHSC Research Complex I  
Aurora, Colorado

# TMI casework will be perfect

on the day it is installed in your lab. We guarantee it. But there are more pressing concerns: How will it support and serve your evolving environment for years to come? How will it continue to hold up and function after scientists, technicians and assistants have banged the drawers, slammed the doors, and spilled various chemicals on its surfaces? These are the real world problems TMI designers and engineers have spent their careers solving.

- **TMI is the nation's largest laminate casework manufacturer.**
- **We've been designing and building casework, countertops and architectural woodwork for all general and specialized lab applications since 1969.**

# Science

is not a static endeavor. It is quite active. TMI designs and builds casework to encourage open collaboration and consultative dialogue.

## Functionality

Ultimately, form follows function. Research labs have different needs than clinical labs, and commercial labs have different needs than educational labs. TMI knows how to support the particular applications in each environment.

- TMI meets or exceeds all SEFA 8 PL-2007 recommended practices for plastic laminate laboratory grade furniture, casework, shelving and tables.
- TMI meets or exceeds all AWI Quality Standards, achieving Premium Grade when required.
- Our casework is designed to comply with all ADA and Seismic Code requirements.
- The TMI SpecCheck® program gives you the freedom to select from our menu of popular and proven specification options.

- TMI is a proud member of the following industry organizations:

Architectural  
Woodwork  
Institute

Scientific Equipment  
and Furniture  
Association

Woodwork  
Institute

AIA Continuing  
Education Provider

## Durability

TMI casework is built to withstand the demands of real world laboratory environments and has been independently tested to meet or exceed all ANSI and industry accepted standards.

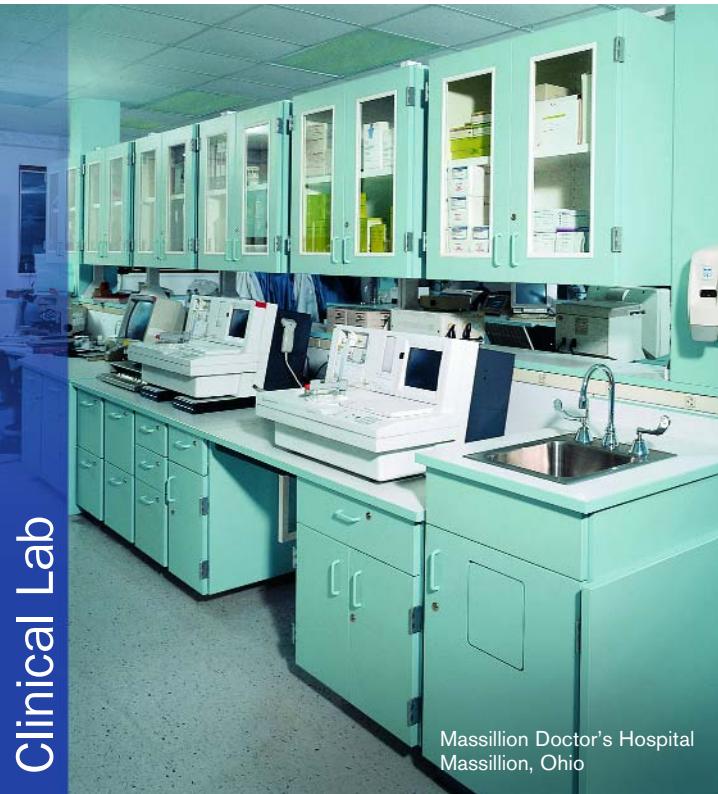

# Inspiration

comes from a precise balance between aesthetics and purpose. In a well designed lab, form and function work in harmony to enable both mind and body to move without obstacles or frustrations. TMI helps create impressive and exceptional environments that inspire excellence.
