

# INDUSTRIAL HIGH-DENSITY STORAGE

LIFE MOVES QUICKLY. YOUR STORAGE SHOULD MOVE WITH IT.

Unlike the traditional static storage concept, mobilized storage systems require one moving aisle that opens and closes where and when needed, to provide full accessibility and quicker, safer retrieval of all materials.

Our ActivRAC® 7,000, 16,000, and 30,000 Mobilized Storage Systems offer three solutions with different load capacities to fit a range of storage needs. Our electric-powered systems feature multiple synchronized motors in each carriage and an available power override unit for accessing materials even in the event of a system or power failure. Whether you operate one lift truck or an entire fleet, ActivRAC® Mobilized Storage Systems offer you more storage capacity within the same square footage.

# INDUSTRIAL HIGH-DENSITY STORAGE

## Wasting space.

With its multiple space-consuming aisles, conventional static racking wastes a significant amount of space you could be using for storage.

## Increasing storage.

With ActivRAC® Mobilized Storage Systems, one moving aisle replaces multiple dedicated aisles required by static configurations, creating up to 50% more space for more racking or shelving units, in the same footprint.

## Limiting profits.

Static racking takes up valuable floor space that could be devoted to a production line or other value add activities instead of storage.

## Increasing revenue.

By eliminating the need for multiple aisles, ActivRAC Systems can free up as much as 50% of your existing storage space for revenue-generating activities without expanding into new space.

## Wasting time.

When essential supply materials are poorly located or not consolidated, it means extra work for your employees and an inefficient use of their time.

## Organizing materials.

ActivRAC Systems allow you to strategically store and organize necessary supplies and materials close to your employees, so they can work more efficiently.

## WHY SWITCH TO MOBILIZED STORAGE?

For more on our high-density systems, visit [bradfordsystems.com/high-density-storage](http://bradfordsystems.com/high-density-storage) or give us a call at 1-800-696-3453.

There's no storage project too big, too small, or too complicated — we can help!

**Free up to 50% more space or double your capacity in the same footprint.** With ActivRAC® Mobilized Storage Systems, one moving aisle replaces multiple dedicated aisles required by static configurations, creating up to 50% more space for more racking or shelving units.

**Increase revenue.** Static racking takes up valuable floor space that could be devoted to a production line or other value add activities. By eliminating the need for multiple aisles, ActivRAC Systems can free up as much as 50% of your existing storage space, so you can expand production and boost output without breaking new ground.

**Organize materials and increase efficiency.** When essential supply materials are poorly located, it means extra work for your employees and an inefficient use of their time. ActivRAC® Systems allow you to strategically store and organize necessary supplies and materials close to your employees, so they can work more efficiently, become more productive, and lower your production costs.
