

## **SCHOOL YOUR SPACE. MAXIMIZE YOUR CAMPUS.**

Reimagine and maximize your spaces to better serve your students.

## Spaces to think, learn, create, & transform.

Today's campuses are evolving, offering more diverse options & welcoming more students. With these changes comes a growing need to better utilize available space.

Campuses are transforming their programming, pedagogies, research, resources, and student activities - and that means physical spaces have to keep up with ever-evolving needs. Whether you're looking to better utilize existing spaces, make room for new programs, or create innovative environments that help attract students and faculty, we offer storage and workspace solutions that will make every part of your campus more efficient, organized, and future-proof.

A campus is like a small city, and we understand the complexities of planning for spaces that will be as useful 20 years from now as they are today. With 50 years of experience across hundreds of different applications, we can bring storage expertise to any campus space:

- **ATHLETIC EQUIPMENT ROOMS**
- **LIBRARIES, MAKERSPACES & OFF-SITE STORAGE**
- **MUSEUMS, ARCHIVES, LABS & RESEARCH COLLECTIONS**
- **CAMPUS POLICE**
- **HEALTHCARE**
- **FACILITIES & MAINTENANCE**
- **PERFORMING ARTS & RECREATION**

# CAMPUS SOLUTION: **ATHLETIC EQUIPMENT STORAGE**

An equipment room is much more than a storage space; it's a recruiting tool and a way to ensure the safety and longevity of the equipment your program has invested in. We'll work with your team to design a system that makes the most of your space, allows you to retrieve equipment, helmets, uniforms, repair parts and tools quickly, and serves as a source of pride for your program— so you can keep your focus on serving student athletes and winning games.

Organized jersey and helmet storage on mechanical-assist mobile storage system | *Washington State University*

Softball Equipment storage room doubles as display showcase using Eclipse® powered mobile storage system | *University of Oregon*

Counter-height mechanical-assist mobile storage system has shelving and drawers accessible for storing small items when open and the surface creates the perfect folding table when closed | *University of Notre Dame*

Player specific cubbies with wire bins for football equipment on mechanical-assist mobile storage system | *University of Oregon*

Compact and organized shoulder pad storage on 4-post shelving | *Louisiana State University*

In-house engineered lockers with storage for spare wheels on top for the wheelchair basketball team | *University of Wisconsin - Whitewater*

Custom baseball bat holders on 4-post shelving | *University of Oregon*

## CAMPUS SOLUTION: **LIBRARY & MAKERSPACE**

Flex carts with concealed casters allow for shelving to be rearranged on demand. Customizable end panels match the overall design of the space | Harper College

While many libraries are opting to downsize the amount of physical volumes they keep on-site in favor of new study and collaborative space, there's still a need for storage on-site. Compact storage helps you keep collections on-site while freeing up space for new amenities, while carts and shelves with hidden casters allow you to easily rearrange your stacks based on future needs.

Create custom-sized meeting and collaboration spaces on-the-fly with movable walls. Carts, cabinets, and locker islands help keep makerspace supplies and projects secure and add an element of storage to functional workspaces.

Shelves with back-lit glass end panels on cantilever shelving

Makerspace workstations with built-in storage lockers for supplies or projects-in-progress.

## CAMPUS SOLUTION: OFF-SITE LIBRARY

Moving collections from libraries across campus to an off-site storage facility is a major undertaking, but it can help free up space for new library services and amenities while providing an optimal storage environment for books and archival collections at a lower cost-per-volume.

Designed specifically for high-density off-site storage, the XTend® Mobile High-Bay Storage System from Spacesaver is the industry's very first mobile high-bay storage system. We've worked closely with dozens of institutions to create the perfect off-site storage & retrieval system for their needs, and we're here to help work through every step of the design and implementation process.

Stationary high-bay shelving stores books, journals and other materials are kept at 50 degrees and 30% relative humidity | University of Texas - San Marcos

The system installed has over 200 specially designed sections of shelving that are 34 feet high which equate to approximately 15 lineal miles of storage. The system houses 450,000 book volumes and 25,000 archive record boxes and can move 180 tons of weight with the push of a button | Western Michigan University

## CAMPUS SOLUTION: **MUSEUMS, ARCHIVES, LABS & RESEARCH COLLECTIONS**

For campus museums, galleries, archival materials, labs, and even faculty research collections, we offer a full line of preservation-grade Viking Museum Cabinets, as well as compact storage and art racks. Keep lab supplies and chemicals secure, organized, and properly ventilated or use sealed cabinets to protect and organize any type of collection, from flat files to specimen jars to bulky geological samples. Glass doors and custom end-panels allow your storage to double as display.

12-sided counter-height Viking preservation cabinets with alternating sections that are configured with either storage drawers or glass shelving and built-in LED lighting to fully showcase the contents. | Arizona State University

Viking flat-file cabinets do double duty: the cabinets provide protection for large maps and other paper items that should be stored flat, while also supporting a counter-top that serves as a convenient workspace

Framed art storage on mechanical-assist mobile art rack system

Storage as display: Powered mobile systems with shelving in end panels offer visitors a new way to understand this collection | University of Arizona - Tucson

## CAMPUS SOLUTION: **CAMPUS POLICE**

*LEVPRO™ suspended shelving system provides quick and convenient storage for police duty bags, jackets and other gear.*

Campus Police & Safety departments have the same needs as a municipal police department. We offer solutions for personal gear lockers, evidence deposit and storage, SWAT gear, and weapons storage, including space-saving options specifically designed for police departments with a smaller inventory of weapons or evidence.

*Pass-thru evidence lockers provide officers a secure place to drop off evidence in the front and for evidence technicians to retrieve and process evidence from the back to maintain chain of custody. | University of North Carolina - Greensboro*

*An officer's home away from home to easily store and organize gear for the job. Includes multiple shelves, internal locking cubbie and drawer to store boots and vest. | University of Alabama*

*Fast Response Locker for discrete weapon storage anywhere on campus.*

Mechanical-assist high-density mobile storage system puts sterile supplies at the point of need during surgery.

University hospitals and on-campus health clinics treat hundreds of patients every day, and having quick access to sterile supplies allows staff more time with those patients. Compact mobile central sterile supply reduces the space footprint of your storage and makes cleaning a breeze. Customizable bin systems are perfect for pharmacies and supply storage on individual floors.

Easy access to surgical kit storage in a hospital's surgical supply room on LEVPRO suspended shelving system allows staff more time to devote to patient care

## CAMPUS SOLUTION: **FACILITIES & MAINTENANCE**

Every campus has to store not only maintenance equipment and tools, but also spare flooring, ceiling tiles, furniture, and other replacement parts. ActivRAC® mobilized storage systems and LEVPRO™ suspended shelving allow you to fit more into your warehouse and make it easy to find and retrieve what you need. They can also function as much-needed “swing space” for storing furniture during building renovations.

Bin storage and easy access to aisles helps maintenance staff spend less time looking for parts and more time doing work around the facility.

Maintenance supplies such as spare tiles, pavers, lighting, and extra furniture stay protected and organized on an ActivRAC mobile system | *Bellevue College*

## CAMPUS SOLUTION: **PERFORMING ARTS & RECREATION**

A university stores costumes for the performing arts department with hanging rods on a compact mobile storage system.

Keeping sheet music and records organized and accessible for students | *University of North Carolina Music Library*

For rec centers, intramural athletics, and outdoor adventure gear, a compact mobile storage system with customizable accessories stores gear efficiently while allowing staff to find what they need quickly.

From costumes and props to instruments to sheet music libraries, we offer an array of solutions for keeping performing arts investments protected and organized.

Outdoor recreation gear such as life vests, tents, and rafts are protected and organized using drawers and shelving on a compact system | *University of Nebraska - Lincoln Outdoor Adventure Center*

## The Design Process

We're here to help you get the exact solution you need, whether it's an industry-standard cabinet or a highly customized system. We're happy to work with all project stakeholders, including end-users, designers, architects, and campus planners to ensure everyone's needs, budgets, and time lines are met.

### **Early Involvement:**

While storage is often an afterthought, the earlier you involve us in your project, the better we're able to ensure we get you the perfect setup for your space, needs, and time line.

### **Space Assessment:**

After you reach out, one of our certified local distributors will meet with you for a complimentary consultation to assess your current space, understand your challenges, and get started on a plan.

### **Design:**

Our design and engineering teams at Spacesaver will work with you and your local consultant to design the perfect solution for your project.

### **Customized for Your Space:**

In addition to our standard products, engineered-to-order solutions account for around half of the projects we work on! Depending on your project, we offer dozens of options for finishes, locks, and configurations so you get exactly what you need for your campus.

### **Installation & Maintenance:**

Once we've manufactured and shipped your solution, your certified local team will install around your schedule. They're also available for ongoing questions and maintenance support.

## Sustainability Comes Standard

We know sustainability is key to your mission, and it's integral to ours, as well. We use non-offgassing materials to protect indoor air quality, manufacture products using steel that contains recycled content (and it's fully recyclable at the end of its life cycle!), and create quality products designed to be with you for the long-haul. After all, the best sustainability strategy is to reduce consumption overall. Many of our products can also help contribute to LEED® Certification.

## Made in the USA

All of our products have been proudly designed, engineered, manufactured, and shipped from our facility in Fort Atkinson, Wisconsin since 1972.

## Contracts Available

We offer a number of state and national contracts to help streamline the bid and purchase process, including Sourcewell. Contact us to learn more about what purchase contracts are available for your project.

## 50 Years of Expertise Backed by a Nationwide Network of Local Support

Spacesaver's extensive network of local distributors employs design consultants, sales specialists, and service technicians who are ready to help design, install, and maintain any campus project, no matter its size or scope. Our distributors often act as liaisons between our clients and their architects and interior designers, providing assistance regarding floor loading, architectural constraints, building codes, and a wide range of other concerns. From complimentary space assessments, to project design and coordination, to product installation and ongoing service, our storage experts pride themselves on exemplary customer service.
